

STATEMENT OF PURPOSE

RS22477C1

The proposed amendments to section 33-909, Idaho Code would allow the panel to more efficiently manage approved projects. Proposed changes would grant the panel authority to alter the scope of work on a project that has already been started including the termination of the project based on recommendations from the appointed district supervisor.

FISCAL NOTE

There would be no impact to the state General Fund. The ability to alter the scope of work could potentially result in cost savings to the fund.
